

SAAN-HUB

Software Engineer

SUMMARY

Creative and detail-oriented software engineer with a deep interest in full-stack development. Proven track record of creating and implementing successful front and back-end web applications. Also experienced as a data analyst. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Web Developer at CODEHANCE, Reading, UK

July 2021 - May 2023

- Collaborated seamlessly with the development team, contributing to the construction and maintenance of robust web applications, resulting in a 20% acceleration in project completion.
- Played a key role in optimizing website performance and enhancing user experience, leading to a 15% improvement in overall site responsiveness.
- Acquired hands-on experience with a diverse range of front-end and back-end technologies, showcasing adaptability and expanding technical proficiency.

Software Engineer at 100devs, Los Angeles, CA

October 2020 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured full-stack web applications.
- Applied agile methodologies like SCRUM for project management.

Recent Projects:

Digital Atlas Map (Full stack Web App) – Digital Atlas Map is a web-based application that enables users to explore information about various countries. It provides details such as country names, currencies, coat of arms, country logos, languages, and more.

JobPlus (Full stack Web App) – JobPlus is a dynamic full-stack job application designed to streamline the job-seeking process. Users can effortlessly search for employment opportunities tailored to their preferences. The platform offers a personalized experience, allowing users to save intriguing job listings for future reference.

100Hours Project –

Other Projects: Thirst Quencher, Rock-Paper-Scissors Game, Los Angeles Stargazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

Cover Letter

I am writing to express my genuine enthusiasm for the opportunity to join your developer relations team and contribute to the growth and vibrancy of your developer community. Having successfully led developer advocacy initiatives and cultivated thriving tech communities in my previous roles, including at 100devs, I am confident in my ability to foster an engaged and collaborative environment within your organization.

In my prior position, I spearheaded developer advocacy efforts, showcasing a deep understanding of coding, blog post publication, active participation in technical discussions, and addressing developer needs. Through strategic initiatives, I expanded our social media community to over 30,000 members with weekly views exceeding 10,000. Hosting 150+ tech events attracted over 150,000 listeners. Concurrently, I developed full-stack applications in JavaScript, React, and Python, significantly enhancing our technical resources and community engagement.

My experiences extend beyond the tech community, including active participation in the 100devs community, where I contributed to the growth and success of the developer ecosystem. Furthermore, I bring additional skills as a data analyst, further enriching my ability to provide insights and data-driven strategies to augment your developer community's success.

These endeavours culminated in remarkable success, with our community landing page receiving over 10,000 clicks per quarter and contributing to the onboarding of 40 engineering teams to our SaaS product. My achievements in building and scaling communities align with the goals of your developer relations team, and I am eager to bring my expertise in technical community building, content creation, and growth strategy implementation to your esteemed organization.

I believe that my ability to balance insights and data with creativity and intuition will contribute to creating unique and differentiated ways to connect and grow your developer community. Thank you for considering my application. I am excited about the prospect of discussing how my experience and passion for working with developers can contribute to your success.

Sincerely,

Nurudeen Adedeji
